-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) filed Mar. 30, 2004 is acknowledged.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: all the numbers mentioned in the specification are not shown in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 1-7 are objected to because of the following informalities: The preamble in claim 1 should read --An auxiliary eyewear display mount--; otherwise, there is no means to provide the function of displaying. The preamble in the dependent claims 2-7 should be the same as that in the independent claim to which claims 2-7 depend from. Appropriate correction is required.

Claim Rejections - 35 USC § 102

Art Unit: 2873

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ennis (5,069,416).

The limitations in claims 1,3 can read on the Ennis's Figs. 1-4, column 2. Ennis discloses an eyewear display mount comprising a clamp 4, an arm extension 6 and a cradle 12 wherein the cradle comprising a relief between the inner flange 18 and the outer flange 18.

6. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nespoli (5,082,225).

The limitations in claim 1 can read on Nespoli's Figs. 1-3. Nespoli discloses an eyewear display mount 1 comprising a clamp 2, an arm extension and a cradle wherein the cradle comprising a relief between the inner flange 5 and the outer flange 6.

Regarding claim 4, the display mount is made of a pliant material or compressible material.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2,5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ennis in view of Rodriguez (5,864,924).

Art Unit: 2873

Ennis discloses the claimed invention as discussed above, however the clamp does not has the structure of a base, a pivot pin, a lever and a spring member whereas the spring member urges the lever against the base as claimed in claims 2,5-7. A clamp including a base, a pivot pin, a lever and a spring member for urging the lever against the base is called a conventional clamp and well known in the art as taught by Rodriguez, for example for the purposes of clamping an article between the base and the lever. Since Ennis and Rodriguez are both from the same filed of endeavor, the purpose disclosed by Rodriguez would have been recognized in the pertinent art of Ennis. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the Ennis's device in light of Rodriguez's teaching by forming a clamp including a base, a pivot pin, a lever and a spring member for urging the lever against the base, as a conventional clamp for the purpose of clamping an article between the base and the lever disclosed by Rodriguez as the same as the applicant does.
